

CUBE: Sharp customization

The cases from the CUBE range are, among other things, suitable as presentation, packaging or transport cases. The framework of aluminium profiles makes it a strong quality product. Moreover, these blank anodized aluminum profiles give the case a solid and professional appearance. The panels, which are available in various colours, can be screen printed or digitally printed with your logo or full colour image. In this way, we ensure that the case always matches your corporate identity.

Cases made to measure for the CUBE product type are competitively priced. You can choose from various heights, while the length and width can be determined to the millimetre. This makes it a perfect alternative to standard cases. The sophisticated production process, renders the CUBE is suitable for production in large quantities.

From magnifying glasses for doctors to agricultural aids, the CUBE cases can be complemented with sculpted foam interiors to accommodate your products. This way you present, pack and transport your products professionally. The CUBE can be used in every industry.

Gefken

Gefken provides solutions that perfectly suit your way of working. Solution-focused customisation. A starting point that hasn't changed since 1959. Perhaps the reason why Gefken, with its own factory in the Netherlands, has grown into the European specialist in the field of custom-made cases and flight cases. Our extensive range of aluminium profile cases and custom-made flightcases, from Gefken Basic to G2 Flightcases, offers solutions for every sector and application. All our products make work easier and more efficient.

From custom-made cases and flightcases to engineered specials

With our own team of engineers, industrial product designers, experts in the field of aluminium profiles and construction possibilities, and our factory with modern machinery, we are able to think beyond cases and flightcases.

Have a conversation with the makers and discover that the best solutions are more surprising than you think. Interested? Make an appointment with Gefken.
