

Gefken Plus for a luxury appearance

The Gefken Plus is a luxury, robust case made to measure. Choose matchchrome steel corners in combination with clear anodised aluminium profiles, or choose black steel corners combined with black anodised aluminium profiles. Choices complemented with matching luxury locks, hinges and handles. Whatever your choice, the Gefken Plus is a case to attract attention.

The panels have a durable HPL top layer with a high scratch resistance that is available in a wide range of textures and colours. From high gloss to ribbed texture and from a wood look to aluminium. The Gefken Plus is made-to-measure and can be printed and fitted with a carrying strap or wheels. Of course, the interior, as well as the dimensions, can be defined completely to customer specifications.

GEFKEN PLUS

Gefken

Gefken provides solutions that perfectly suit your way of working. Solution-focused customisation. A starting point that hasn't changed since 1959. Perhaps the reason why Gefken, with its own factory in the Netherlands, has grown into the European specialist in the field of custom-made cases and flight cases. Our extensive range of aluminium profile cases and custom-made flightcases, from Gefken Basic to G2 Flightcases, offers solutions for every sector and application. All our products make work easier and more efficient.

From custom-made cases and flightcases to engineered specials

With our own team of engineers, industrial product designers, experts in the field of aluminium profiles and construction possibilities, and our factory with modern machinery, we are able to think beyond cases and flightcases.

Have a conversation with the makers and discover that the best solutions are more surprising than you think. Interested? Make an appointment with Gefken.
